

Grant Guidelines

Length of grant: Usually annually

Amount: \$1,000 to 4,000

The proposal's findings are to be presented in written and electronic form for inclusion on Trust web site. A minimum of five bound copies. We encourage publication in professional journals where suitable. The Trust often requests presentation of the final product at either the Annual Meeting or a meeting of the Science Advisory group.

Proposal will be reviewed by the SAG, a nine-member board consisting of representatives from conservation groups, state and local government, academic and research institutions, appointed by the board of trustees. Their input will be communicated to the Trust board and to the author of the proposal. The board will then act upon the recommendations. Modifications (if any) will be made and a contract written. Upon execution of the contract 1/3 of the funding will be made available. Delivery of an interim report and the final report trigger the remaining 2/3.

Please ask any other questions this does not cover.
